Power Electronics

Lecture 35 Solar PV System

Myen Uddin

Lecturer,

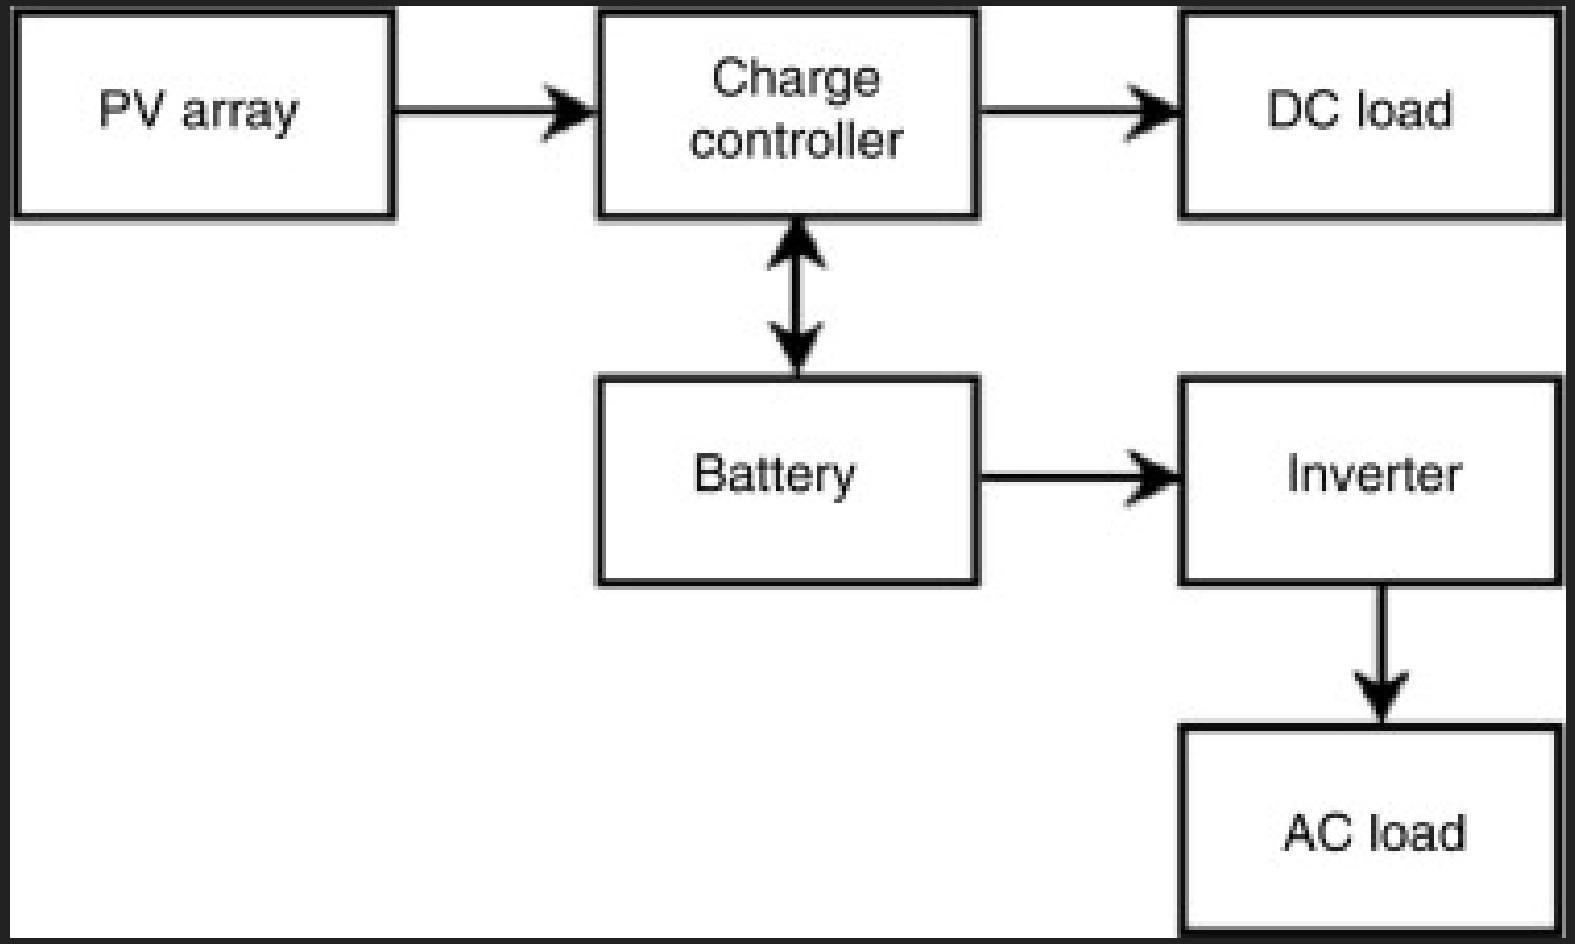

EEE, SUST

How Solar system works?

Youtube link: https://youtu.be/xKxrkht7CpY?si=usTJScddffeTnslK&t=6

AC load

Contents covered in this course!

- **Power semiconductor switches and triggering devices** – (2-8)
- **Regulated power supplies** – (9-16)
- **Uncontrolled and controlled Rectifiers** – (17-22)
- **Resonant converters - (23- 24)**
- **Inverters – (25-30)**
- **AC voltage controllers - (31-34)**
- **Power Electronics in Renewable Energy Systems - 35**

Thank You

for this wonderful journey.
I hope to see you again in the future and wish you a bright and successful career ahead.

As our class ends today, I'd really appreciate your honest feedback about the journey we had together.
